Metro Nuovo	15.00%		15.00%	No VOC	Very long life	Yes	Vancouver Canada	

Note 1 Pre-Consumer glass is used to make float glass. Manufacturers report from 10% to 20% post-consumer (cullet) use
 Note 2 Post-Consumer content is glass that has been collected through the curbside recycling program, sorted and crushed to make new products
 Note 3 Glass tile fires at temperatures in excess of 600 degrees C, at which all carbon is burned. There are no organic materials or Volatile Organic Compounds (VOC) present in our products
 Note 4 All fired glass and ceramic products last a very long time and see reduced possibility of ending up in the landfill.
 Note 5 Glass can be recycled indefinitely. All glass products returned to Interstyle will be reused to make new tiles
 Note 6 Our tiles are made in Burnaby (Vancouver) British Columbia, Canada. Buildings located within a 500 mile radius qualify for Credit 5, 5.1 and 5.2
